What Is Class Retriever?

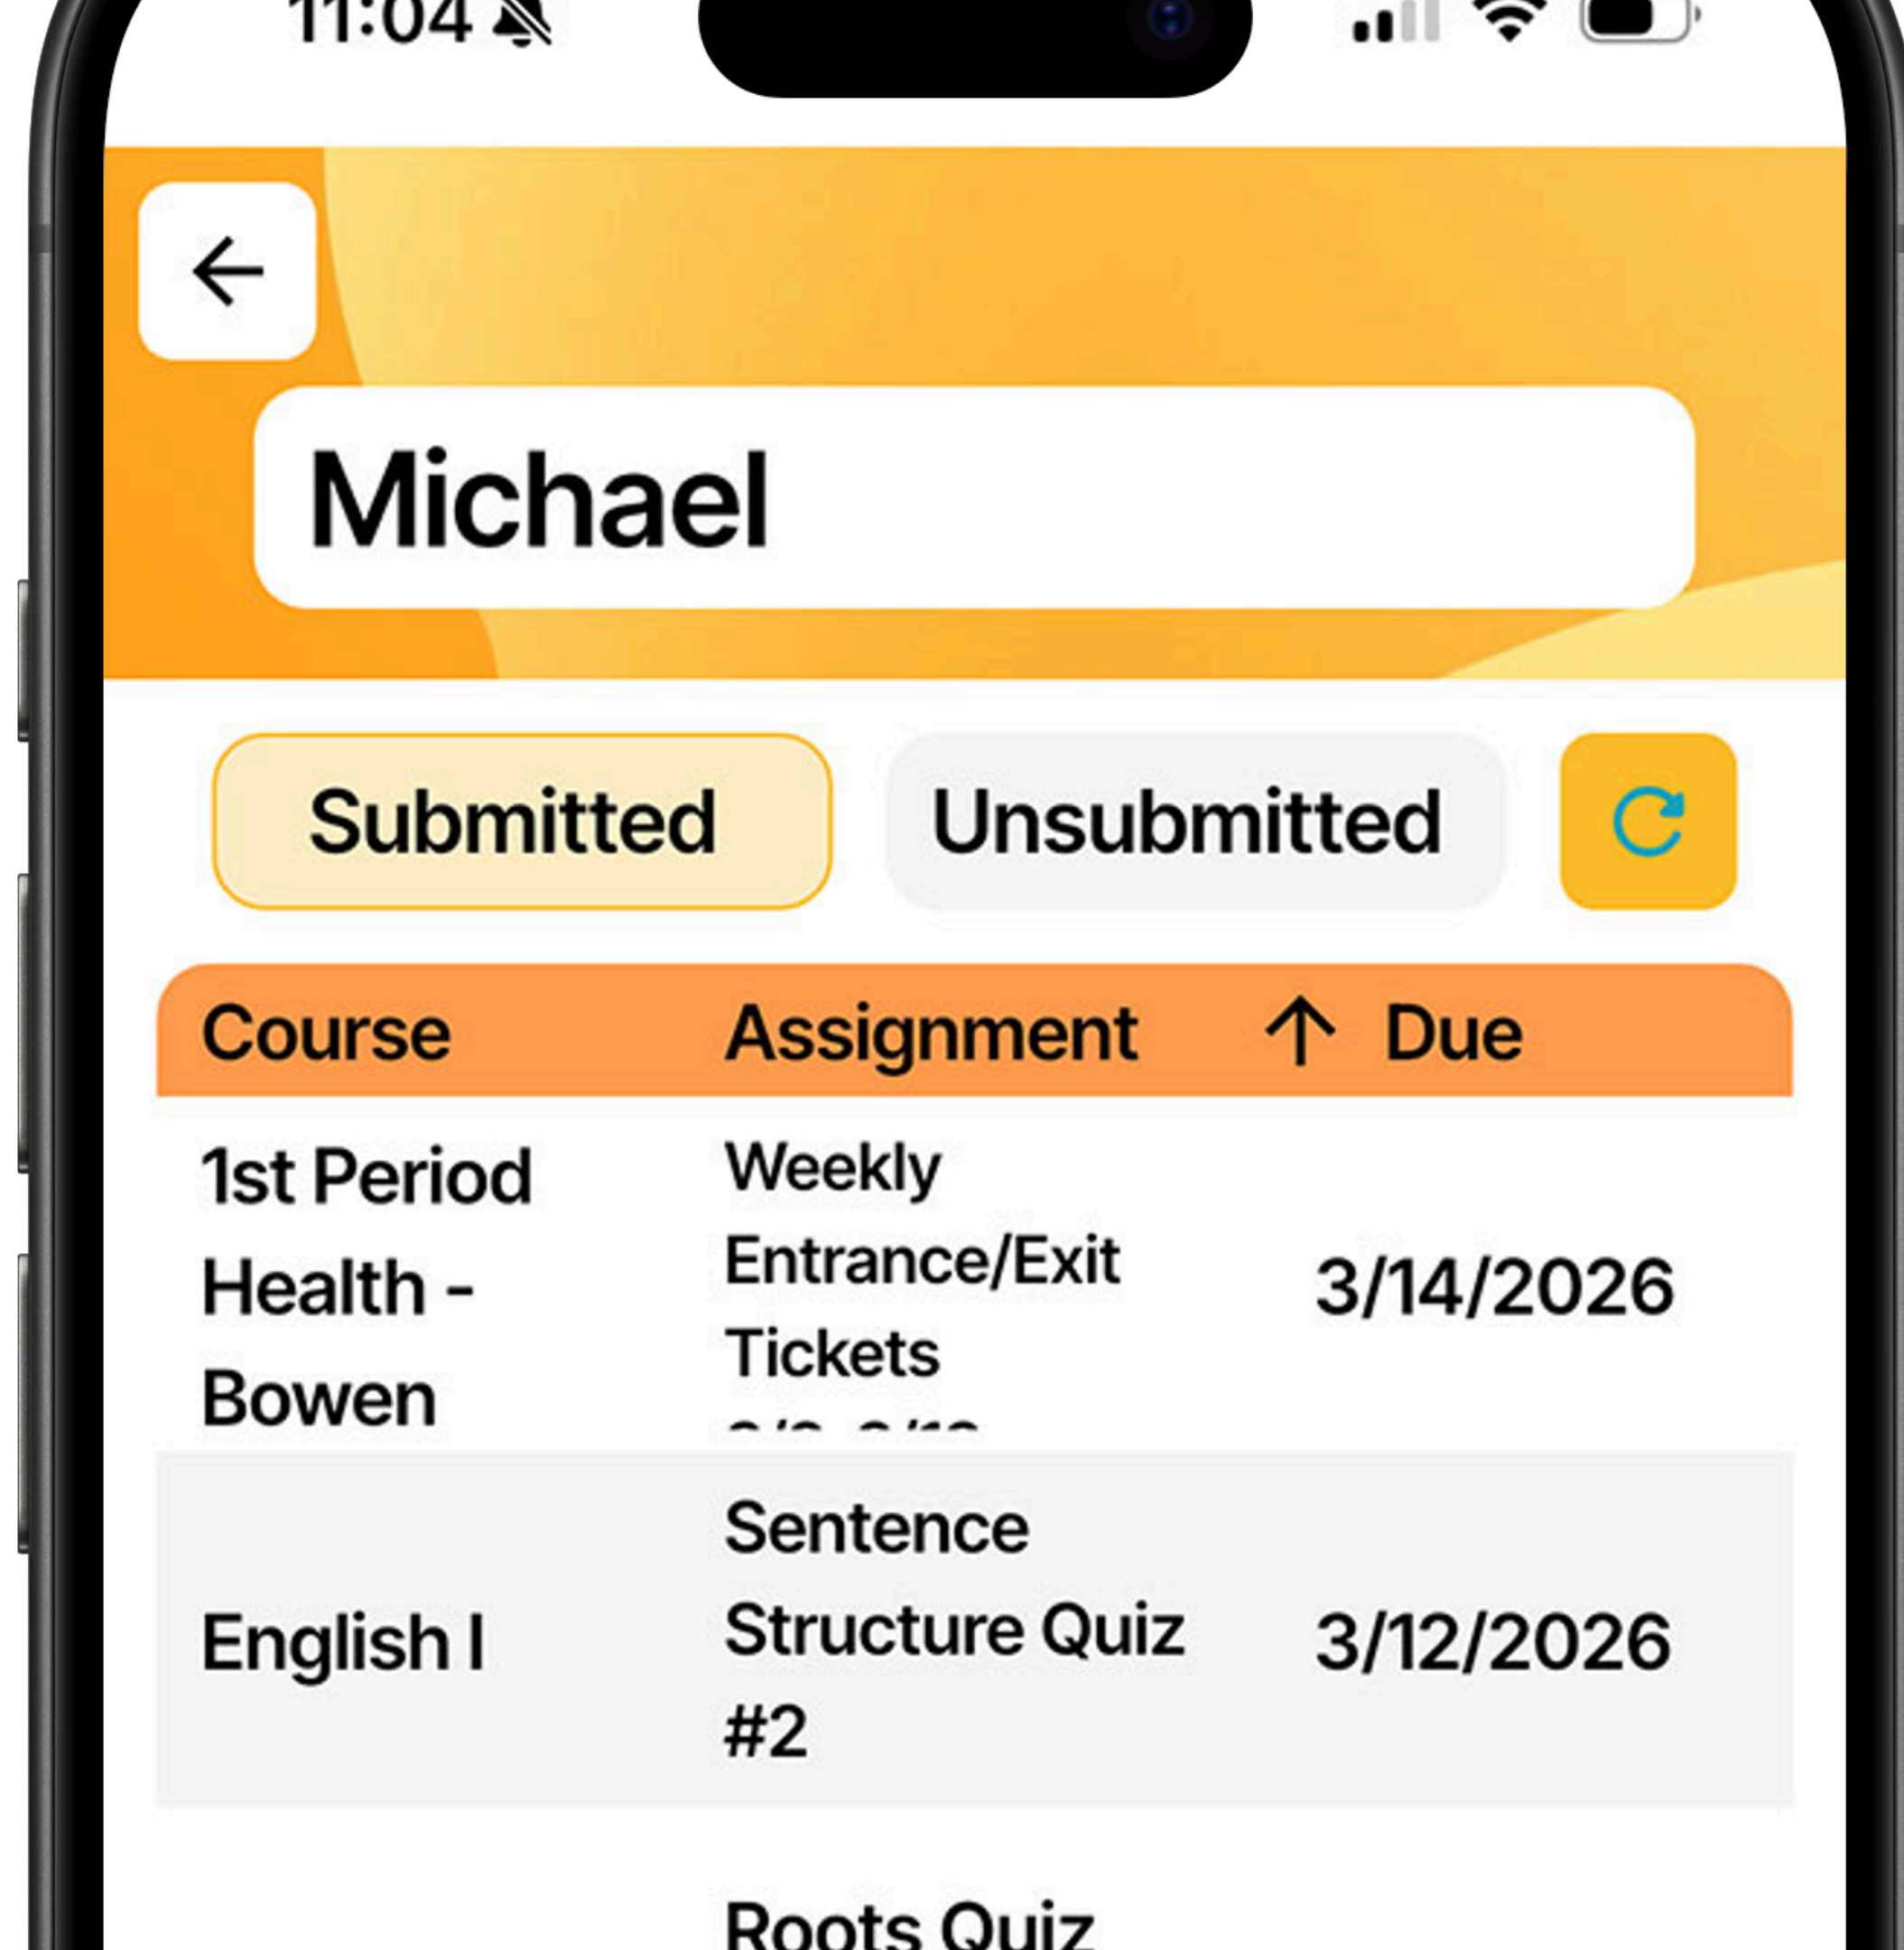

Class Retriever is a mobile app that lets parents and students see all Google Classroom assignments in one place.

Users sort assignments by whether they are **submitted** or **unsubmitted**.

Users then sort by course or due date to **see what is due next** or the most overdue!

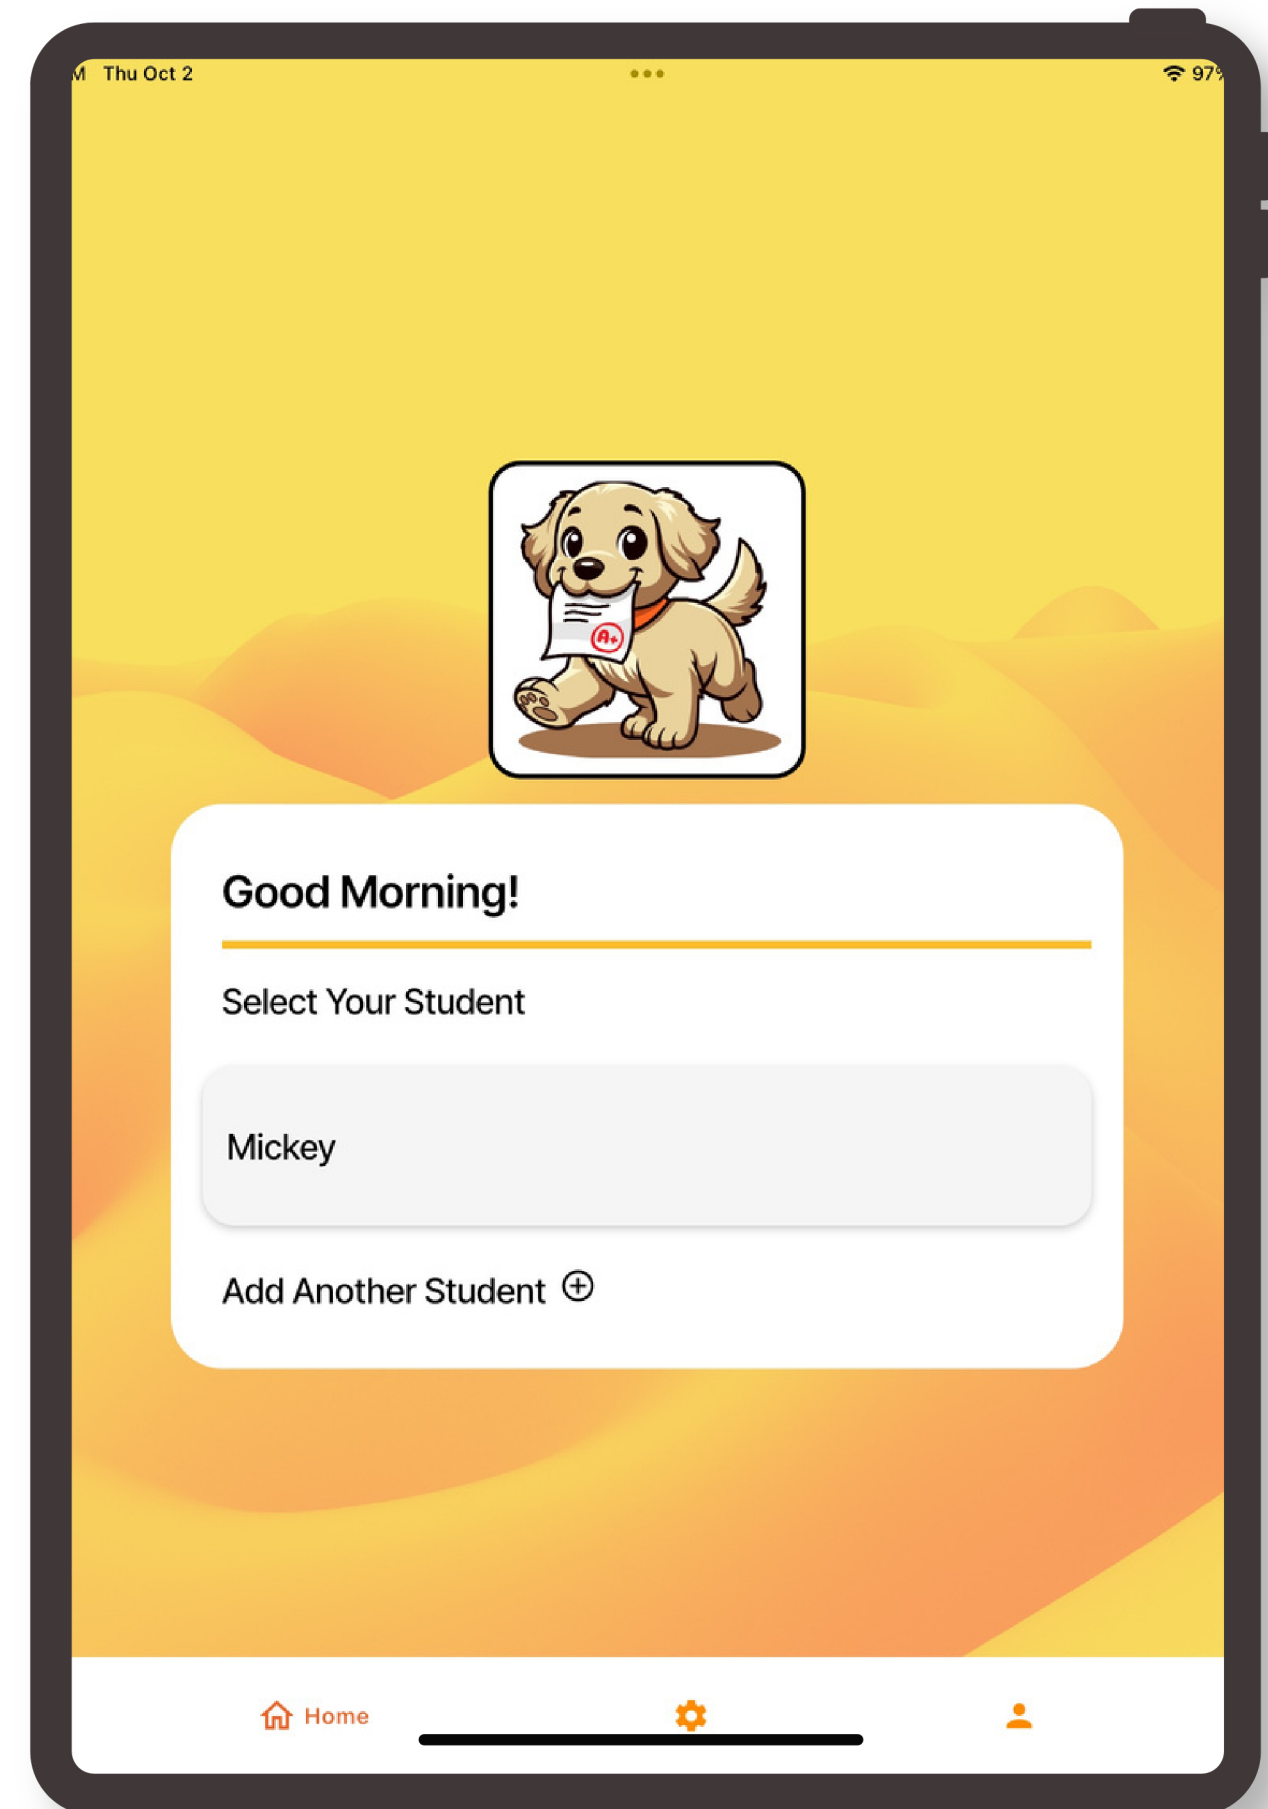

Assignments that are missing AND late are **colored red**.

Earth and Space Science 2025-2026	Montana Climate Graphs	03/25/2026
1st Period Health - Bowen	Vaping: Know the Truth	03/23/2026
1st Period Health - Bowen	Fentanyl PSA	03/20/2026
English I	Photo Analysis	03/18/2026
1st Period Health - Bowen	Cannabis	03/17/2026

What Problems Does Class Retriever Solve?

Parents can support students who have a hard time tracking their assignments.

(Google Classroom does not have a parent portal.)

Students can see all of their Google Classroom assignments in one place.

(They no longer have to open every Google Classroom subfolder to see each assignment.)

Frequently Asked Questions

How often does Class Retriever refresh?

As soon as your student submits an assignment, you can refresh your screen and the updated assignment status will be reflected.

**I have kids
attending
different schools,
can I use
Class Retriever
for all of them?**

Yep!

As long as the students are ages 13+ and your school or district allows Class Retriever, you can add them to your app.

Is my student data protected?

YES.

Class Retriever uses
Google's security protocols
and is:

- ✓ FERPA compliant
- ✓ COPPA compliant
- ✓ Verified by Google
- ✓ Verified by Apple

Who created Class Retriever?

Class Retriever was built by a mom in Missoula, Montana who learned how to code (she didn't use AI) to build an app to help her kids and others' kids.

User Quotes

“My student had completed three assignments but forgot to click “Submit” in Google Classroom for them.

“Class Retriever showed that, so she was able to turn them in – on time!”

User Quotes

“My kiddo was part of a group project. His lab partner didn’t turn in the assignment!”

“My son saw this and was able to proactively manage the situation.”

User Quotes

“Our daughter had a big science project due on Friday.

“We saw this in Class Retriever on Monday and were able to help her plan so she completed it early.”

Next Steps

1

Download Class Retriever from your mobile app store.

2

Ask your school or district IT director to enable the Class Retriever API in Google Classroom.
(Without this, the app won't work.)
